POWER OF LOGISTICAL RELATIONSHIPS FOR STREAMLINED SOURCING SOLUTIONS

100 miles of pipe moved thousands of miles in 90 days using ARS Global's partnerships and logistical problem solving. **Here's how it happened.**

BACKGROUND

A lot can go wrong between placing an order and getting it delivered to its final destination. That's why strong operations and logistical partnerships are key to an end-to-end success story for pipeline sourcing projects.

ARS Global partners with several logistics providers for streamlined, on-time delivery of vital pipeline materials. These partners provide turnkey solutions for fast, dependable, reliable results for owner-operators.

ARS Global's logistical partnerships helped a client move 100 miles of pipe in only 90 days.

CHALLENGES OVERCOME

Owner-operators aren't always given the luxury of ample time and resources to move vital pipeline project materials safely and efficiently from Point A to Point B. In one pipeline sourcing project, a client needed to relocate pipe out of a pipe yard in the Northeast. However, because the land was purchased by another owner, the pipe needed to be moved in less than 100 days.

Logistics and transportation partners worked closely with ARS Global to move the pipeline in the mandated timeline, successfully delivering 100 miles of pipe to the client.

BENEFITS REALIZED

- Client-centered, tailored support for end-to-end logistical problem-solving
- Fast delivery while protecting vital assets
- Overcoming unexpected barriers and challenges with collaboration and communication
- Trusted partners operate as a logistics and transportation extension of ARS Global

“Logistics partnerships are like a marriage. It requires work from both ends, but when the effort is there, the outcomes and benefits to pipeline operators is obvious. ARS Global has those kinds of partnerships.”
